Posture trend

SCAN DATE	COVERAGE	FAILURES
2026-06-13	78%	12
2026-06-28	86%	8
2026-07-13	92%	4

Finding activity

SCAN DATE	NEW	RECURRING	RESOLVED	REOPENED	ACCEPTED
2026-06-13	12	0	0	0	0
2026-06-28	3	5	7	1	1
2026-07-13	1	2	3	0	0

Compliance exposure summary

FRAMEWORK	FAILING CONTROLS	OPEN FINDINGS
NIST CSF 2.0	3	5
ISO 27001:2022	2	4
SOC 2	2	3

Open findings by severity

CRITICAL 2	HIGH 3	MEDIUM 0	LOW 0	INFORMATIONAL 0
---------------	-----------	-------------	----------	--------------------

Coverage caveat: coverage is controls evaluated divided by controls requested. Missing or errored evidence is never treated as passing; the report must be read alongside the latest scan coverage figure.

Services with open findings

PROVIDER	SERVICE	OPEN FINDINGS
AZURE	Storage	2
AZURE	App Service	2
AZURE	Network	1

Top failing controls

CONTROL	SEVERITY	OPEN FINDINGS
Prevent anonymous access to storage CR-AZURE-STORAGE-002 Storage accounts should prevent public blob access unless explicitly approved.	CRITICAL	2
Require HTTPS for web applications CR-AZURE-APP-001 App Service applications should redirect users to encrypted HTTPS connections.	HIGH	2
Do not expose SSH to the internet CR-AZURE-NETWORK-001 Network security groups should not permit inbound SSH from any internet address.	HIGH	1

CloudRanger is a deterministic local-first CSPM. This report is a posture summary, not a compliance certification.
