Posture trend

SCAN DATE	COVERAGE	FAILURES
2026-06-13	78%	12
2026-06-28	86%	8
2026-07-13	92%	4

Finding activity

SCAN DATE	NEW	RECURRING	RESOLVED	REOPENED	ACCEPTED
2026-06-13	12	0	0	0	0
2026-06-28	3	5	7	1	1
2026-07-13	1	2	3	0	0

Compliance exposure summary

FRAMEWORK	FAILING CONTROLS	OPEN FINDINGS
NIST CSF 2.0	3	5
ISO 27001:2022	2	4
SOC 2	2	3

Open findings by severity

CRITICAL 2	HIGH 2	MEDIUM 0	LOW 0	INFORMATIONAL 0
---------------	-----------	-------------	----------	--------------------

Coverage caveat: coverage is controls evaluated divided by controls requested. Missing or errored evidence is never treated as passing; the report must be read alongside the latest scan coverage figure.

Services with open findings

PROVIDER	SERVICE	OPEN FINDINGS
GCP	Storage	2
GCP	Logging	2
GCP	Compute	1

Top failing controls

CONTROL	SEVERITY	OPEN FINDINGS
Prevent public access to storage buckets CR-GCP-STORAGE-001 Cloud Storage IAM should not grant access to all internet users or all authenticated users.	CRITICAL	2
Alert on firewall rule changes CR-GCP-LOGGING-119 A log-based metric and alert should detect changes to VPC firewall rules.	HIGH	1
Do not expose SSH to the internet CR-GCP-FIREWALL-001 VPC firewall rules should not allow SSH from the public internet.	HIGH	1

CloudRanger is a deterministic local-first CSPM. This report is a posture summary, not a compliance certification.
